

TERRENCE PARAS LAPPAY

INFORMATION TECHNOLOGY STUDENT | MOBILE APPLICATION DEVELOPER

Address: Dagupan City, Pangasinan, Philippines
Phone: +63 968-653-9871
Email: terrencelappay2118@gmail.com
Website: https://lappayportfolio.vercel.app

PROFESSIONAL SUMMARY

Information Technology student with creative and detail-oriented UI/UX Designer and Mobile Application Developer with experience in designing intuitive digital experiences from concept to implementation. Adept at translating user needs into visually appealing and functional interfaces while ensuring usability, accessibility, and responsive design across multiple platforms.

TECHNOLOGIES & DESIGN TOOLS

- Frontend: HTML, CSS, JavaScript, Flutter, Jetpack Compose, Python, C#
- Backend: Django, PHP
- Database: MySQL, MongoDB
- Tools: Git, GitHub, Unity, Figma, Tailwind CSS
- Cloud: AWS (basic)

PROJECTS EXPERIENCE

Lunas | AI-Assisted Urban Infrastructure Monitoring System
Flutter / Next.js / React / FastAPI / TensorFlow Lite / Open CV / MongoDb / Supabase

- Designed intuitive mobile and web interfaces for reporting and monitoring urban infrastructure hazards.
- Developed user-facing workflows for photo-based reporting, GPS location submission, and maintenance status tracking.
- Contributed to responsive dashboards that support report validation, repair coordination, and progress monitoring.

ClarifAi | AI-Powered Data Analytics Platform
React.js + Chart.js/D3 / Node.js + Express.js / MongoDB Atlas

- Designed interactive dashboards for presenting complex datasets through clear visualizations and analytical insights.
- Developed frontend interfaces for dataset uploads, data exploration, and AI-assisted analysis.
- Focused on intuitive navigation and accessible data presentation to improve usability for nontechnical users.

DermaScan | AI-Powered Skin Analysis Application
Flutter / React/TypeScript / Django / MongoDB / CNN with an h5 file + LLM llama

- Designed mobile interfaces for image-based skin condition assessment and symptom analysis.
- Developed frontend workflows for image submission, displaying AI-generated results, and presenting personalized recommendations.
- Contributed to responsive, user-centered interfaces that simplify interactions with AI-powered skin analysis features.

Echoes of the Lighthouse | 3D Adventure Exploration Game
Unity / C# / Blender / MetaMask
Echoes of the Lighthouse is a 3D adventure exploration game set on a mysterious island, where players navigate interactive environments, discover landmarks, and uncover the story surrounding a lighthouse. Contributed to frontend development and player-facing interfaces, focusing on intuitive navigation, immersive gameplay, and a seamless user experience.

EDUCATION AND CERTIFICATION

Bachelor of Science in Information Technology (BSIT) 2023- Present
PHINMA University of Pangasinan
Specializing in System Development
Certificate of Completion - Amazon Web Services Cloud Computing Fundamentals

SKILLS

UI/UX Design

- User Interface Design & Interaction Design
- Wireframing & High-Fidelity Prototyping
- User Flows & Information Architecture
- Design Systems & Component Libraries
- Usability, Accessibility & User-Centered Design

Mobile Application Development

- Cross-Platform Development (Flutter & Dart)
- Native Android UI Development (Jetpack Compose)
- Mobile API Integration
- Mobile Application Architecture
- Responsive & Adaptive Mobile Interfaces
