

TERRENCE PARAS LAPPAY

UI/UX DESIGNER | MOBILE APPLICATION DEVELOPER

Address: Dagupan City, Pangasinan, Philippines
Phone: +63 968-653-9871
Email: terrencelappay2118@gmail.com
Website: <https://lappayportfolio.vercel.app>

PROFESSIONAL SUMMARY

Information Technology student with creative and detail-oriented UI/UX Designer and Mobile Application Developer with experience in designing intuitive digital experiences from concept to implementation. Adept at translating user needs into visually appealing and functional interfaces while ensuring usability, accessibility, and responsive design across multiple platforms.

TECHNOLOGIES & DESIGN TOOLS

- Frontend: HTML, CSS, JavaScript, Flutter, Jetpack Compose, Python, C#
- Backend: Django, PHP
- Database: MySQL, MongoDB
- Tools: Git, GitHub, Unity, Figma, Tailwind CSS
- Cloud: AWS (basic)

PROJECTS EXPERIENCE

Lunas (UI/UX Designer | Front-End)

Flutter / Next.js / React / FastAPI / TensorFlow Lite / Open CV / MongoDB / Supabase

- Lunas is an AI-assisted urban infrastructure maintenance and monitoring system for Dagupan City. Citizens can report hazards with photos and GPS data, while officials and repair teams manage validation, work orders, SLA deadlines, repair evidence, and verification through connected mobile and web platforms. Privacy-aware image processing and audit logs help keep the workflow accountable from report to closure.

ClarifAi(UI/UX Designer | Front-End)

React.js + Chart.js/D3 / Node.js + Express.js / MongoDB Atlas

- ClarifAi is an intelligent analytics platform that transforms uploaded datasets into understandable insights, visualizations, forecasts, and recommendations. Its natural-language assistant makes data analysis accessible to non-technical users, while shared dashboards and reports support collaborative decision-making.

DermaScan (UI/UX Designer | Front-End)

Flutter / React/TypeScript / Django / MongoDB / CNN with an h5 file + LLM Ilama

- DermaScan AI is an innovative, AI-powered platform designed to help users identify and manage skin conditions through a mobile app. The platform combines Convolutional Neural Networks (CNNs) for image-based skin condition detection and Large Language Models (LLMs) for symptom analysis and personalized approach recommendations.

EDUCATION AND CERTIFICATION

Bachelor of Science in Information Technology (BSIT) 2023- Present
PHINMA University of Pangasinan
Specializing in System Development
Specializing in Ethical Hacking
Certificate of Completion - Amazon Web Services Cloud Computing Fundamentals

SKILLS

UI/UX Design • User Interface Design • User Experience Design • Wireframing • Prototyping • User Flow Design • Responsive Design • Design Systems • Visual Design	Front-End Development • Responsive Web Development • Mobile Interface Development • Component-Based Development • Version Control • Cross-Browser Compatibility	Core Skills • Problem Solving • Team Collaboration • Adaptability • Attention to Detail • Time Management • Creative Thinking	Design Principles • Visual Hierarchy • Typography • Color Theory • Grid & Layout Design • Design Consistency • User-Centered Design (UCD) • Human-Centered Design • Mobile-First Design
